7. Evaluating Progress Toward Measurable Goals MCM 4

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The Village has continued to enforce its existing ordinances and local requirements for construction site sediment and erosion control as part of its site plan review process. The Village has also continued to provide for public comment on Village construction projects and has continued conducting routine site inspections for construction projects within the Village. In addition, Village code provides the authority to issue stop work orders with respect to construction site stormwater runoff.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

Village code requires submittal of NOI's and SWPPP's for developments within the Village which have reached the threshold limit (i.e., disturbance > 1 acre). All SWPPP's submitted are reviewed. Deficient SWPPP's are rejected with comments and returned to preparer. Re-submitted SWPPP's are reviewed and approved if deemed compliant.

C. How many times was this observation measured or evaluated in this reporting period?

0

(ex.: samples/participants/events)

D. Has your MS4 made progress toward this measurable goal during this reporting period?

● Yes ○ No

E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?

● Yes ○ No

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

The Village will continue to maintain and update its local ordinances and Best Management Practices (BMPs) to control construction site runoff. The Village will also continue to maintain and update its provisions to allow for public review and comment on construction projects and to conduct routine site inspections and enforcement activities with respect to construction site stormwater runoff.
